

How to Attach Your Door Bow ©

- 1. Unpack the Door Bow you will find 2 pieces of material to wrap your door, these are the same length. The pack also includes the bow with safety pins already attached on the back.
- 2. Start from the inside of your door and wrap a piece of material vertically from the top to the bottom, tie together at the front of the door with a double knot. Where you tie the material will be the positioning of the bow so tie in the correct position, adjust the position if necessary by gently pulling the material.
- 3. Take the second length of the material and from the back of your door to the front of your door wrap in a horizontal position and tie to the piece already attached to your door. This knot would be where your bow will be positioned. Trim off any excess materials and save. This saved material may be needed to tie the bow to the material.
- 4. This will create a crisscross effect just like wrapping an upright rectangular gift box.
- 5. Take the small piece of material, you will have a little spare from the wrapping, use this to tie the material together on your door, this will create the pull-in effect in the centre of your door, again just like wrapping a present. Tie this taut without tearing the material or you could use a cable tie (not supplied).
- 6. You could easily straighten up the material at this point, fan them out at the edges of your door to create a more shaped effect maybe but take care not to cover any part of the locking mechanisms around the edge of the door! You may want to adjust a little if you don't want to cover the letterbox. Bows off-centre look very stylish and your postman will love you.
- 7. Take the bow and tie it with the attached ties on the reverse do this at the point where your material meets, pull as tight and double knot. WOW, it's looking good!
- 8. On the back of the bow, you will find 2 safety pins, make sure your bow is straight use these to discreetly pin the back of the bow to the horizontal material this will help keep your bow in a straight position and help protect it from the wind etc..
- 9. Step back, take a look, smugly smile at your neighbours' unwrapped doors, take a pic and send it to us we love to see the bows in their new homes.
- 10. We can't guarantee our bows will be ok to use again but many customers tell us they do so finished with your bow, want to use it again? Unpin the safety pins, remove the bow perhaps give it a dust off if needed. Wrap carefully for next time make sure it is dry before storing. Untie the knots and carefully fold the material away for next time.
